

Amazon Sales Dashboard - Project Documentation

Project Overview

This project presents an interactive Power BI dashboard to analyze Amazon sales performance across regions, products, customers, and time. It provides decision-makers with KPIs and insights for business growth.

Business Objective

Monitor sales, orders, customers, profit margin, and year-over-year growth while identifying high-performing regions, products, and customer segments.

Dataset

The dataset contains order details, customer information, product categories, regions, sales, profit, and order dates covering 2014–2017.

Tools & Technologies

Power BI Desktop, Power Query, DAX, SQL, Excel, Data Modeling.

KPIs

Total Sales: \$2.3M; Total Orders: 5K; Total Customers: 793; Average Order Value: \$458.6; Profit Margin: 12.47%.

Dashboard Pages

Executive Overview with KPI cards, Sales Trend Analysis, Regional Analysis, Product Analysis, Customer Analysis, and Segment Analysis.

Key DAX Measures

Total Sales, Total Orders, Total Customers, Total Profit, Profit Margin %, Average Order Value, Sales PY, Sales Growth %, Orders PY, Customer Growth %, Running Sales, Sales YTD.

SQL Analysis

SQL queries demonstrate data extraction, sales analysis, customer analysis, product analysis, regional analysis, and performance reporting.

Business Insights

- West region is the top revenue contributor.
- Technology is the highest-performing product category.
- Consumer segment contributes the largest share of sales.
- Sales and orders show positive year-over-year growth.

- Profit margin remains healthy.
- Average Order Value has room for improvement through cross-selling and upselling.
- Regional and customer analysis help prioritize business strategies.

Recommendations

Increase investment in high-performing regions, expand top-selling products, improve customer retention, optimize Average Order Value through bundles, and monitor KPIs regularly using Power BI.

Skills Demonstrated

Power BI, DAX, SQL, Power Query, Data Modeling, KPI Development, Data Visualization, Business Intelligence, Sales Analytics.
